2

Available with custom aspect ratios, and image sizes up to 59.75" x 119.75"

3

Stylish 3/8" beveled frame creates a sleek, modern appearance

LuminEsse

High performance screen for modern architectural and design applications

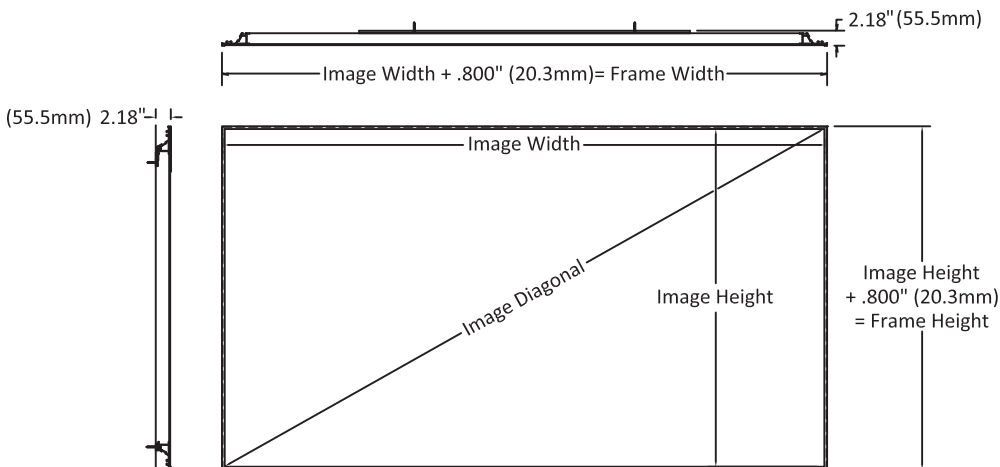

Developed to meet the demands of the most sophisticated architectural applications, LuminEsse fixed frame front projection screen systems come standard with a 3/8" sleek, thin beveled frame. The high-performance Stewart Filmscreen front projection material is laminated to a rigid surface, allowing for a super-thin frame while still ensuring the screen remains flat.

An optional LED light kit can be added to provide bias or mood lighting, while still rendering an elegant, minimalist aesthetic.

All this adds up to LuminEsse being one of the lowest profile fixed frame front projection screens in existence, and the only such screen that is a Stewart Filmscreen.

FEATURES:

- For use with any of Stewart Filmscreen's award winning, front projection screen materials
- Available in custom aspect ratios, and image sizes up to 59.75" x 119.75"
- Stylish 3/8" beveled frame creates a sleek, edgeless appearance
- Ships fully assembled, providing ease of installation
- Optional LED light kit

Stylish 3/8" beveled matte black frame creates an elegant, minimalist aesthetic

Optional LED lighting offers bias or mood lighting
